EDUCATION

Mansoura University

Bachelor in Computer Science

Mansoura, Egypt

2021 – 2025

- Cumulative grade: Good; Graduation project: A+, 199/200.

EXPERIENCE

DrCorp

Back-End Engineer

Jan 2026 – Present

Mansoura, Egypt

- Sole backend engineer responsible for developing **EasyLink CRM**, an internal CRM platform for a Saudi telecom reseller managing Mobily, Zain, STC, and EasyLink projects.
- Designed and developed the **Laravel 13 backend** and **50+ RESTful API endpoints** with pagination, filtering, sorting, authentication, authorization, and IDOR protection.
- Built core systems for **clients, contacts, opportunities, SIM activation, employee targets, and performance tracking**, including an 8-stage opportunity pipeline with 24+ statuses.
- Designed a weighted KPI system across **5 performance metrics** with real-time achievement calculations and configurable weights.
- Implemented Excel-based bulk SIM import and confirmation workflows using **asynchronous job processing**, validation, result pagination, and per-bucket exports.
- Maintained **1,674+ automated tests** throughout development with zero regressions.
- Collaborated with frontend, UI/UX, QA, BA, and DevOps teams in an Agile/Scrum environment using Jira.

TRUE Marketing Consultancy

Full-Time Back-End Engineer Intern

Sep 2024 – Dec 2025

Mansoura, Egypt

- Developed and maintained scalable **Laravel-based REST APIs** for multiple production mobile applications.
- Worked on **ElMohandes**, a service marketplace, implementing core APIs and admin dashboard functionality for users, services, and operations.
- Contributed to **SATIC**, a cement retail management platform, implementing business workflows for retail sales and order processing.
- Collaborated with cross-functional teams to ensure API reliability, performance, and smooth integration with mobile applications.

BAS10

Part-Time Junior Back-End Developer

Oct 2024 – Sep 2025

Remote

- Developed and maintained backend APIs and dashboard features for a consultation and scheduling platform using **Laravel**.
- Implemented core functionality including **session scheduling**, user management, and data handling.
- Designed structured RESTful APIs and collaborated with frontend developers to ensure reliable system integration.

Salahly

Freelance Back-End Developer

Sep 2025 – Dec 2025

Remote

- Developed the complete backend API for a mobile service platform connecting customers with local technicians for home services and maintenance.
- Built and maintained the admin dashboard for managing users, service providers, service requests, and system operations.
- Implemented core business workflows for service booking, tracking, and management.

PROJECTS

Flash-Sale Checkout API | *Laravel, MySQL* | GitHub

- Designed a high-concurrency checkout API for flash-sale scenarios with limited inventory.
- Prevented overselling using database transactions and row-level locking to maintain inventory consistency.
- Implemented short-lived stock reservations and order creation only from valid, unexpired holds.

Blogging Platform REST API | *Laravel 11, Sanctum, MySQL* | GitHub

- Developed a RESTful API with CRUD operations for posts, comments, and tags using Laravel and Sanctum authentication.

ThinkInk Backend Server | *Go, PostgreSQL, REST APIs* | Project Website

- Developed the backend for the graduation project using Go, PostgreSQL, and RESTful APIs.

TECHNICAL SKILLS

Languages: PHP, Go, C++, C#, SQL

Backend: Laravel, Eloquent ORM, REST APIs, PHPUnit, Sanctum, MySQL, PostgreSQL

Tools: Git, GitHub, PHPStorm, VS Code, Jira
